

DECLARATION

I, Isao Yoneya of Hanabusa Institute for the Protection of Industrial Property of Ochanomizu Square Bldg., 1-6, Kandasurugadai, Chiyoda-ku, Tokyo, Japan do hereby solemnly and sincerely declare,

1. that I am acquainted with the Japanese and English language,
and
2. that the English translation attached hereto is a true translation of the paragraph at page 5, lines 15-20 in the following document (the paragraph corresponding to that at page 5, lines 22-29 in the specification of U. S. Patent Application No. 09/242,828):
Japanese Patent Application No. Hei 9-195220 filed on July 7, 1997

And I make this solemn declaration conscientiously believing the same to be true and correct.

This 7th day of May, 2001

The Hanabusa Institute for the Protection of
Industrial Property

Isao Yoneya

Isao Yoneya

Translation of the paragraph of the priority application corresponding to the paragraph at page 5, lines 22-29 in the present specification

The aqueous dispersion of polyurethane in the present invention contains a non-ionic surface active agent that is acetylene glycol in which each carbon atom immediately adjacent to the triple-bonded carbon atoms is substituted with a hydroxyl group and a methyl group, and/or an ethylene oxide addition product of the acetylene glycol. As such a non-ionic surface active agent, Surfynols 104 and 440 produced by Nissin Chemical Industries, and so on are exemplified. It is desirable that adding ratio of the non-ionic surface active agent extends from 0.01% to 1.0% on the basis of the solid content in the aqueous dispersion of polyurethane.
